Campus Novartis, Basel

The NOVARTIS-campus has been realized by worldwide renowned devisers and designers. We are proud that this experts selected our plant for the realization of the trelliswork ceilings. The trelliswork was manufactured with 80 mm raster in Yewtree wood, the absorption is ensured by melamine foam inserted in the ceiling cavity.

We grant a special compliment and thanks to the installations partners ISOLAG AG and PHONEX GEMA AG, Zuerich, for the exemplary organisation and quality.
